

LPD 17 IPDE

(An Update 4/11/2001)

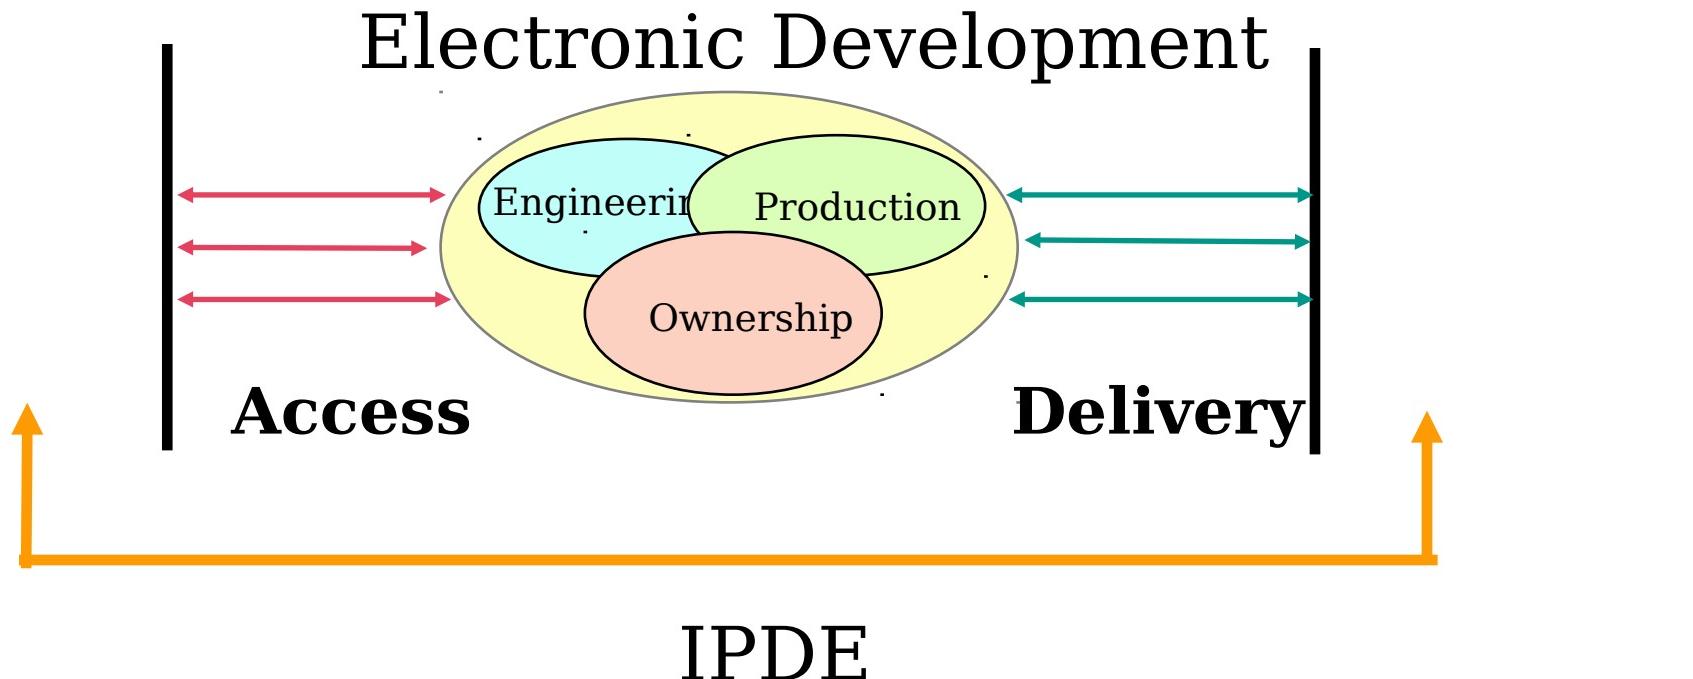

Information Technology Director
(4/11/2001)

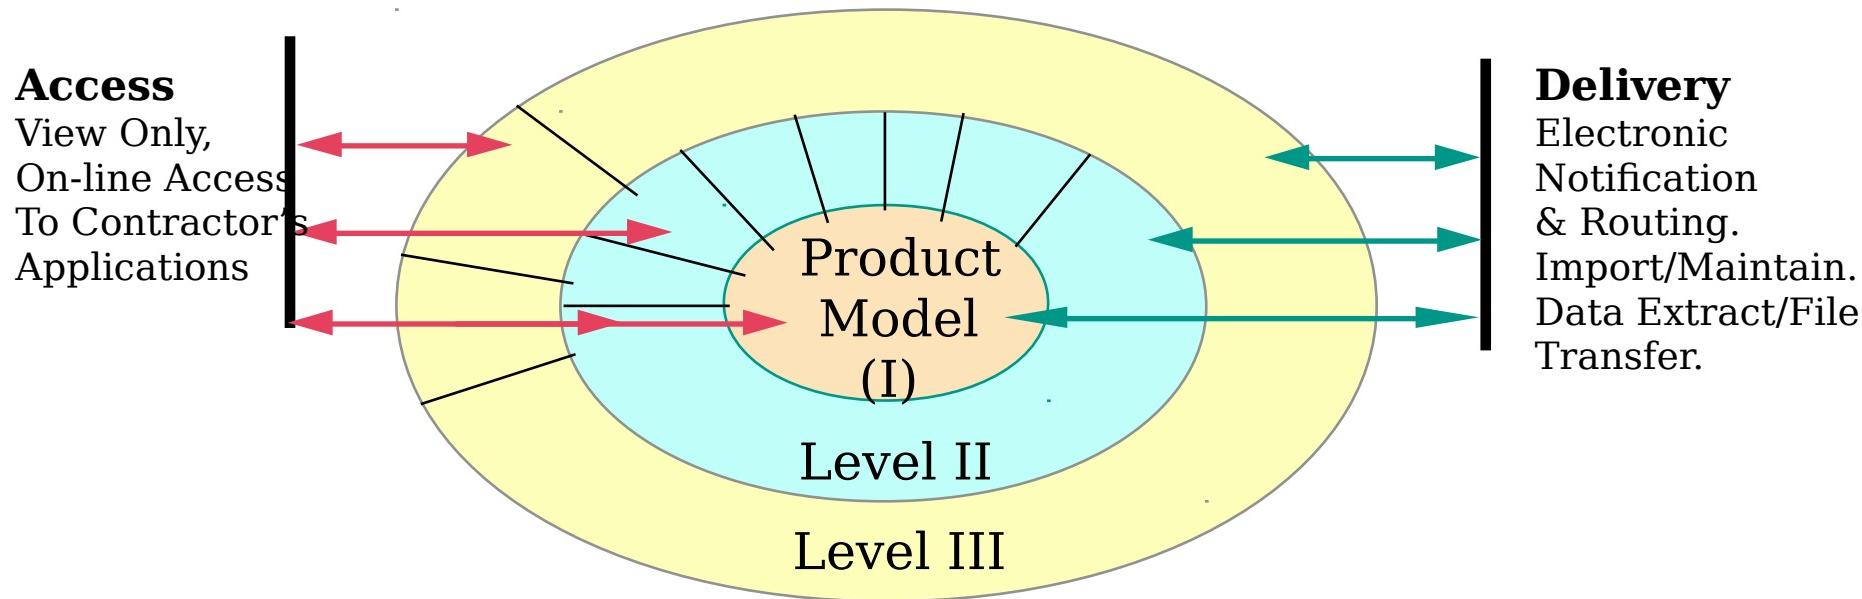

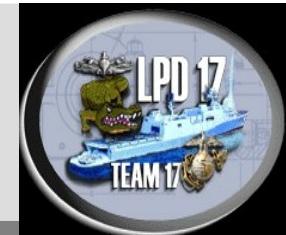

1996 IPDE VISION/CONCEPT

Electronic Development, Access and Delivery

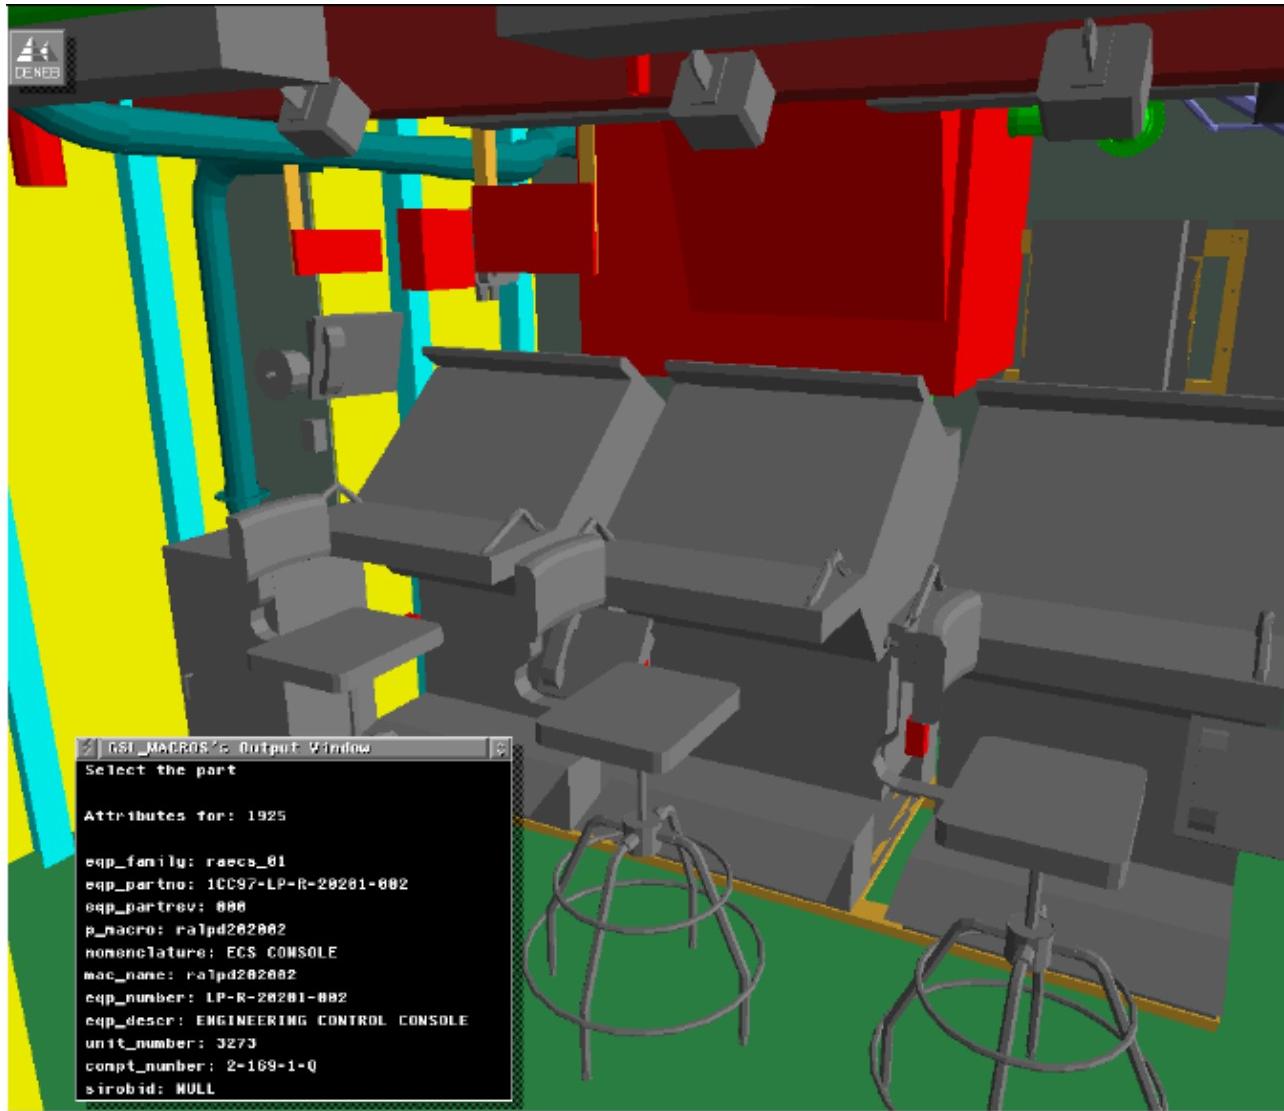

IPDE Goal: Integration of Data

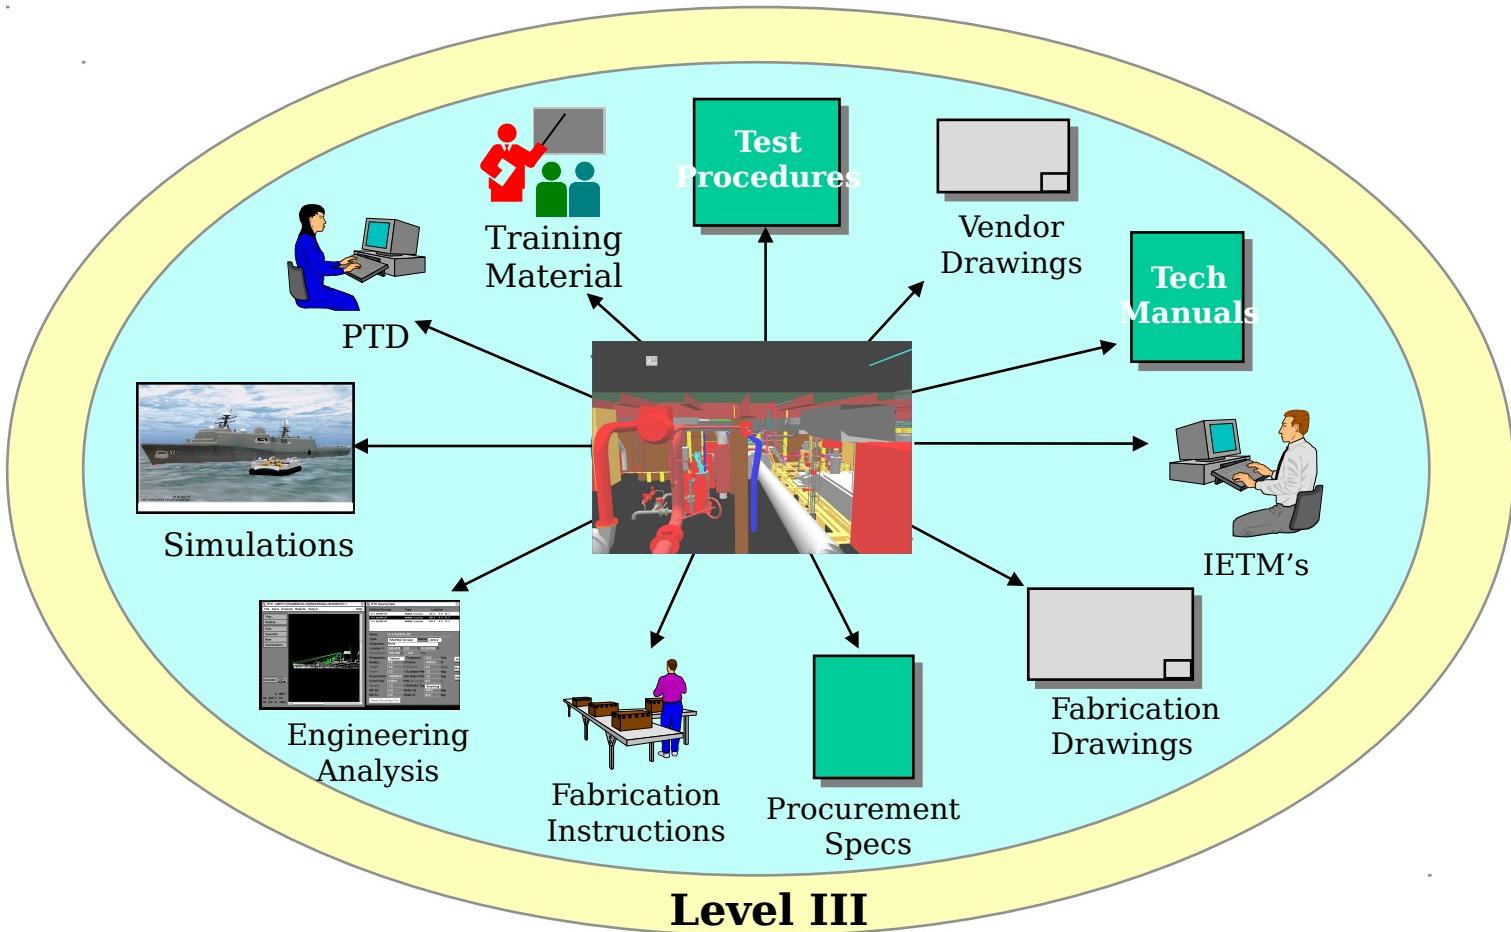

Level I - Product Model Data (3D Geometry + Attributes)
Level II - Support Data (Vendor Drawings, Manuals, GFI, etc.)
Level III - Program Execution Data (MIRWS, IMP, C/SCS, etc.)

The LPD 17 IPDE: Level 1

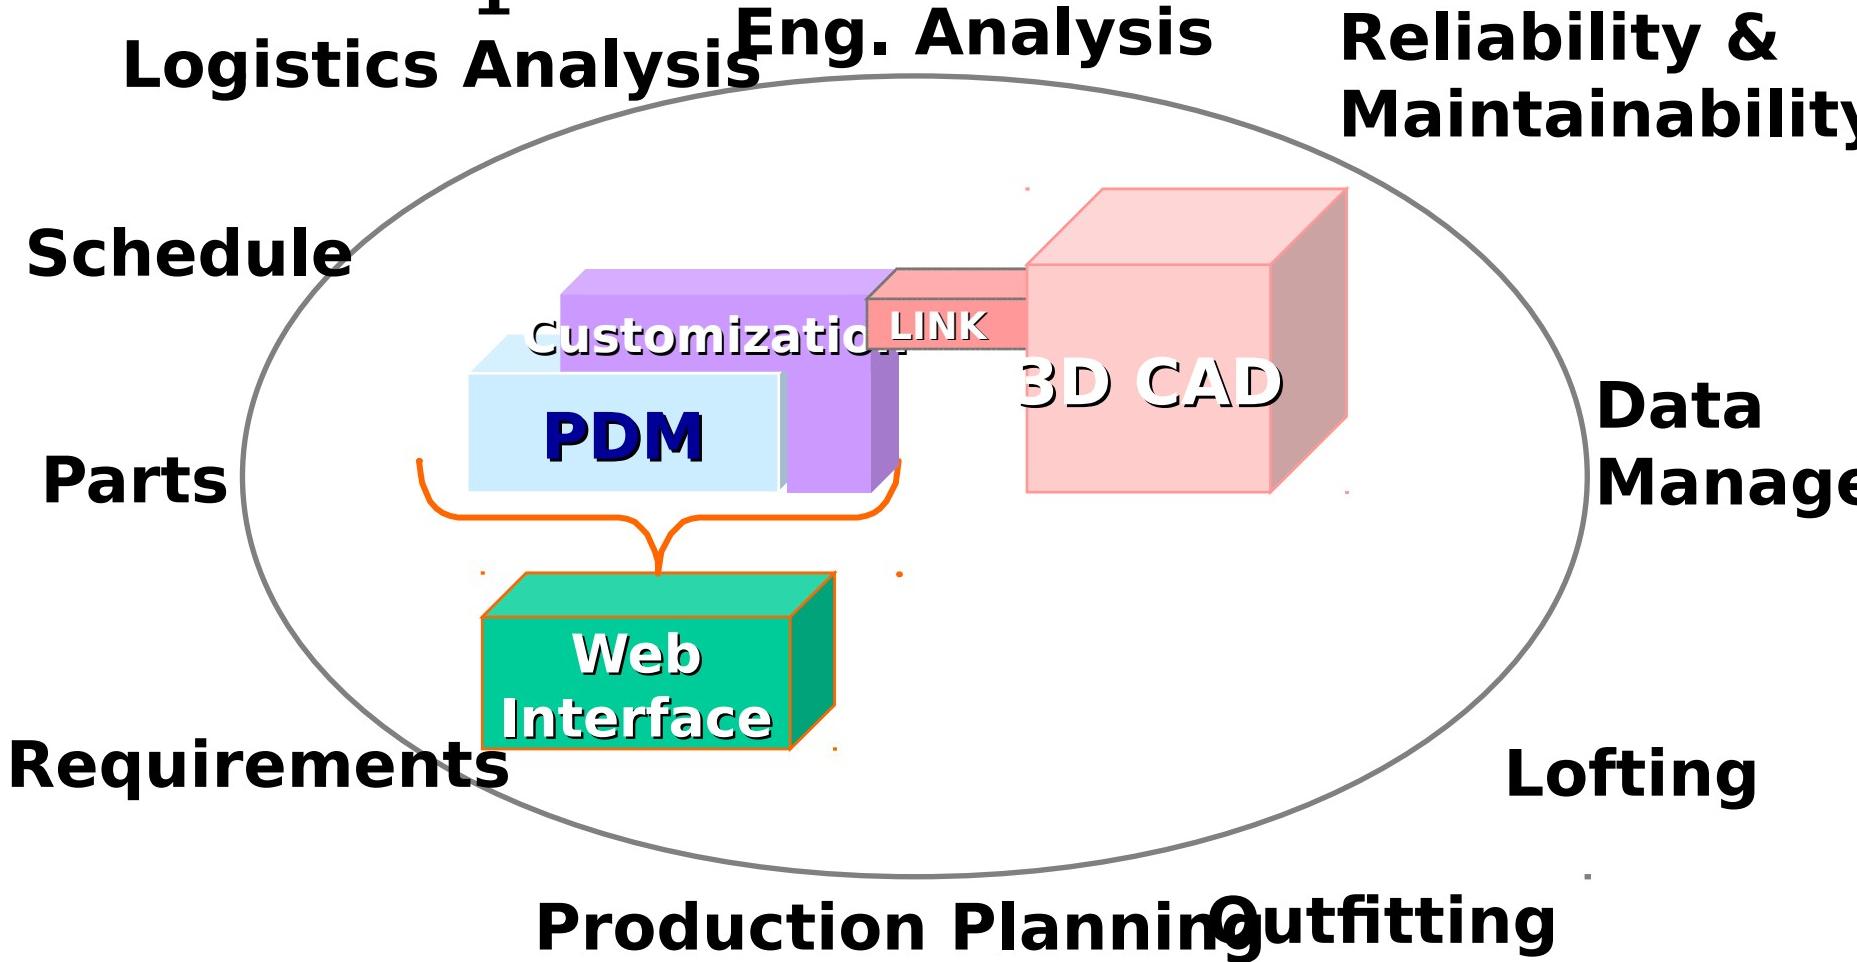

3D Model is the Configuration Master

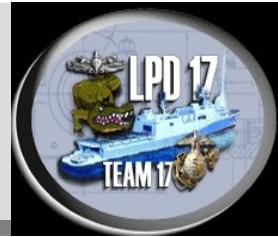

The LPD 17

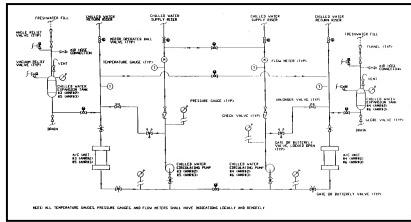

Implementation

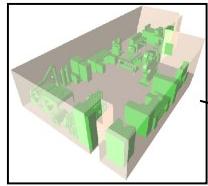

LPD 17 3D Model Approach

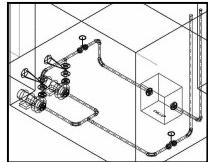

System Development

Initial Space Arrangements

Priority Routing

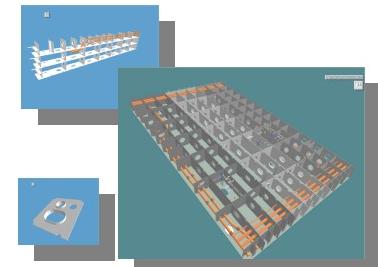

Vendor Furnish Info

3D Model

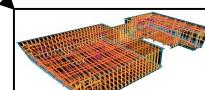

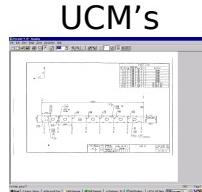

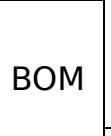

Production Engineering Simulations

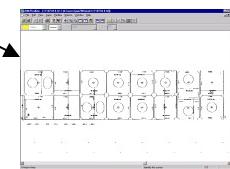

Fleet Review

Arrangement Drawings

(NC Tapes, etc.)

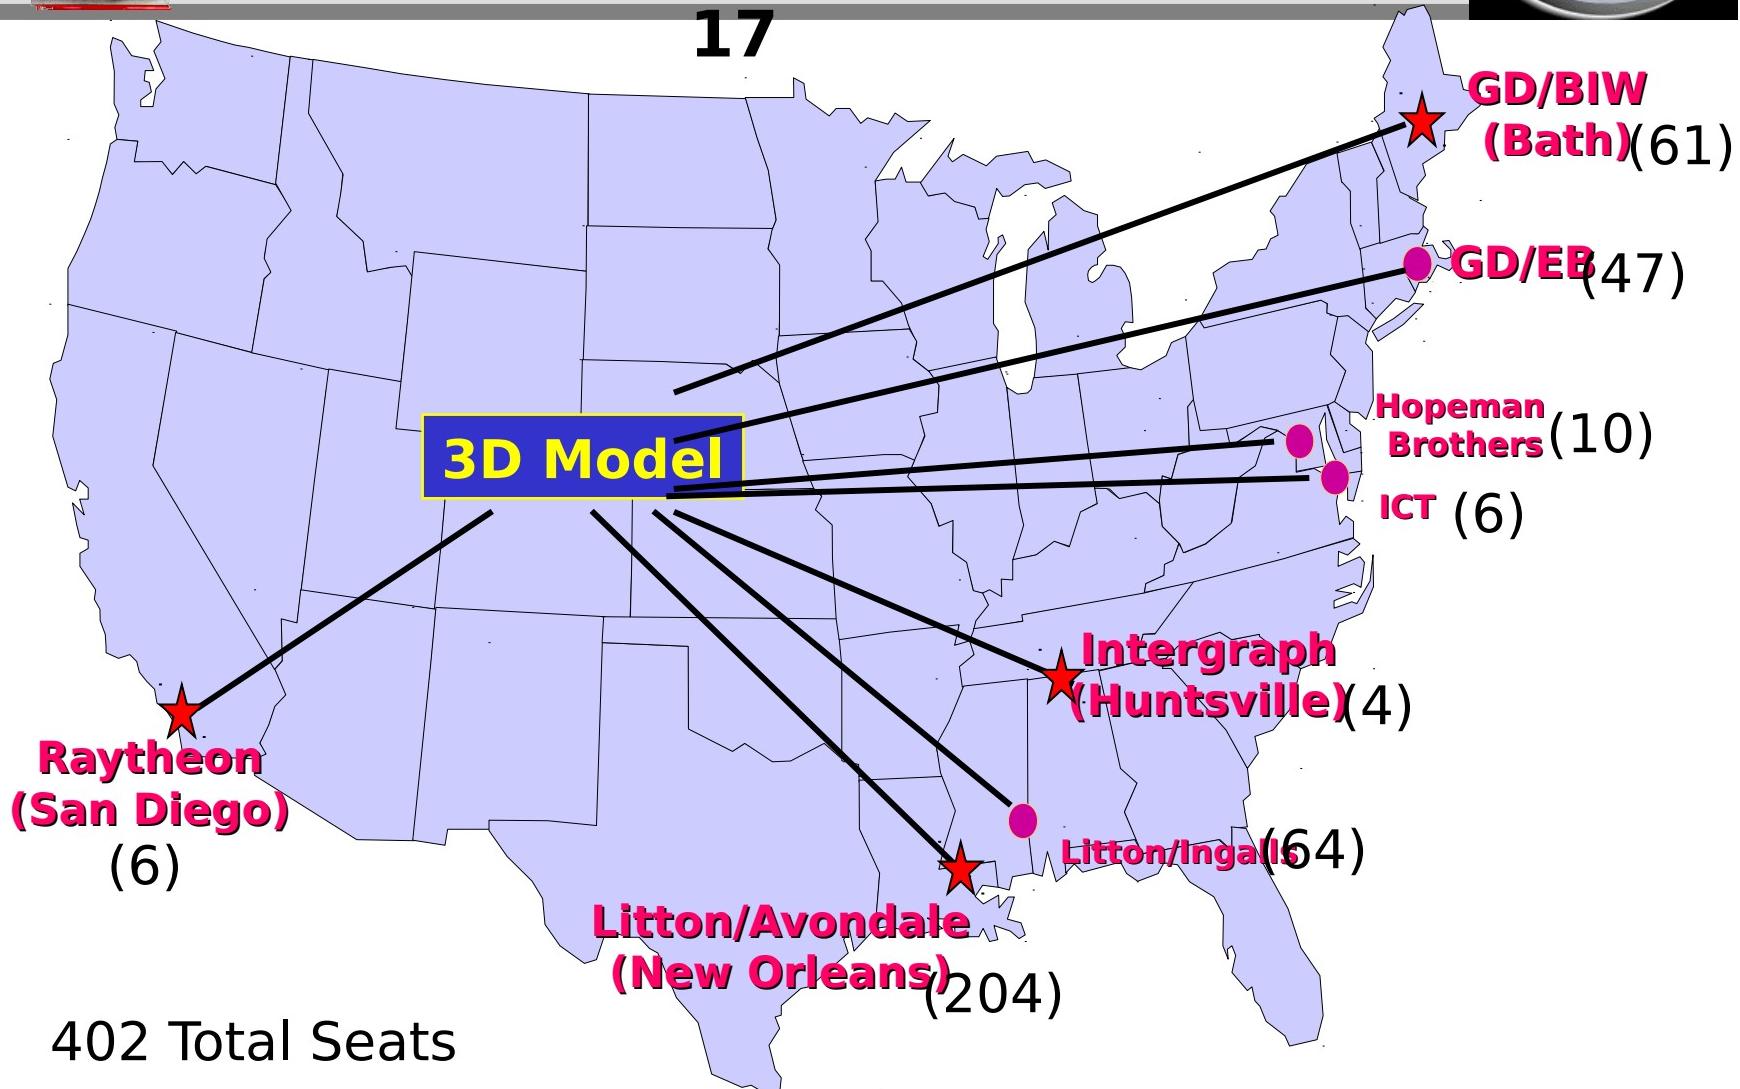

Lofting System

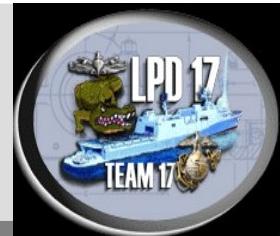

Eight (8) Sites Collaboratively Developing 3D Product Models for LPD

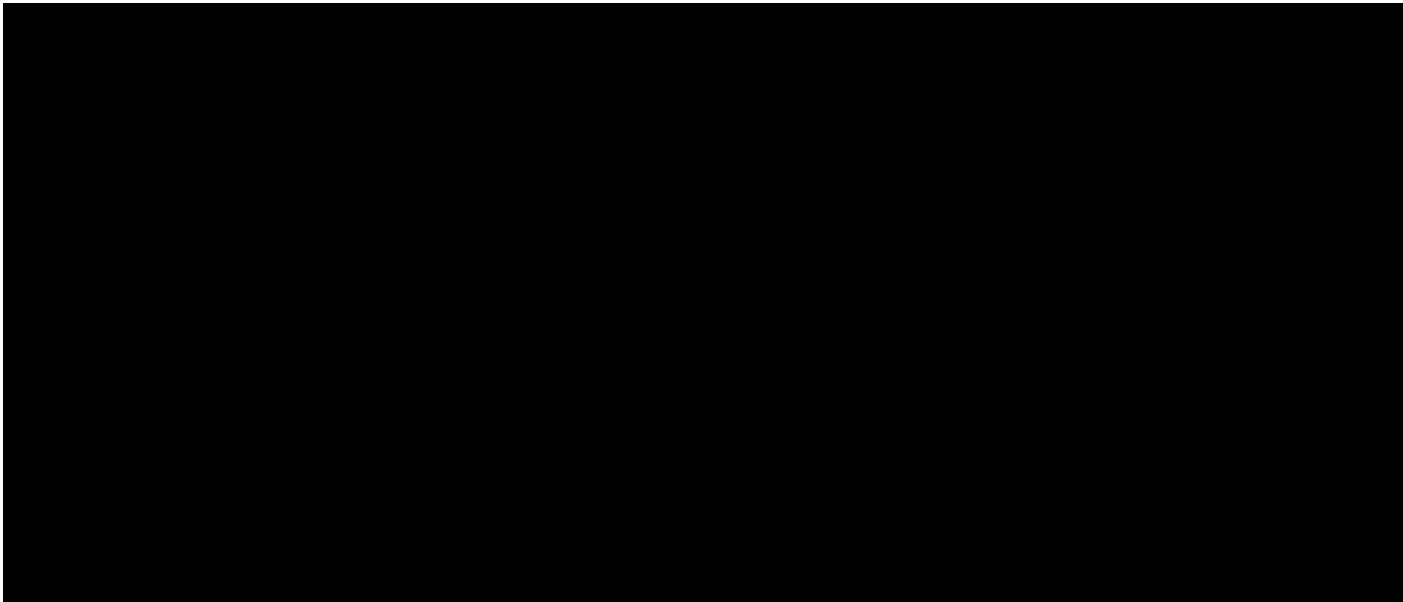

17

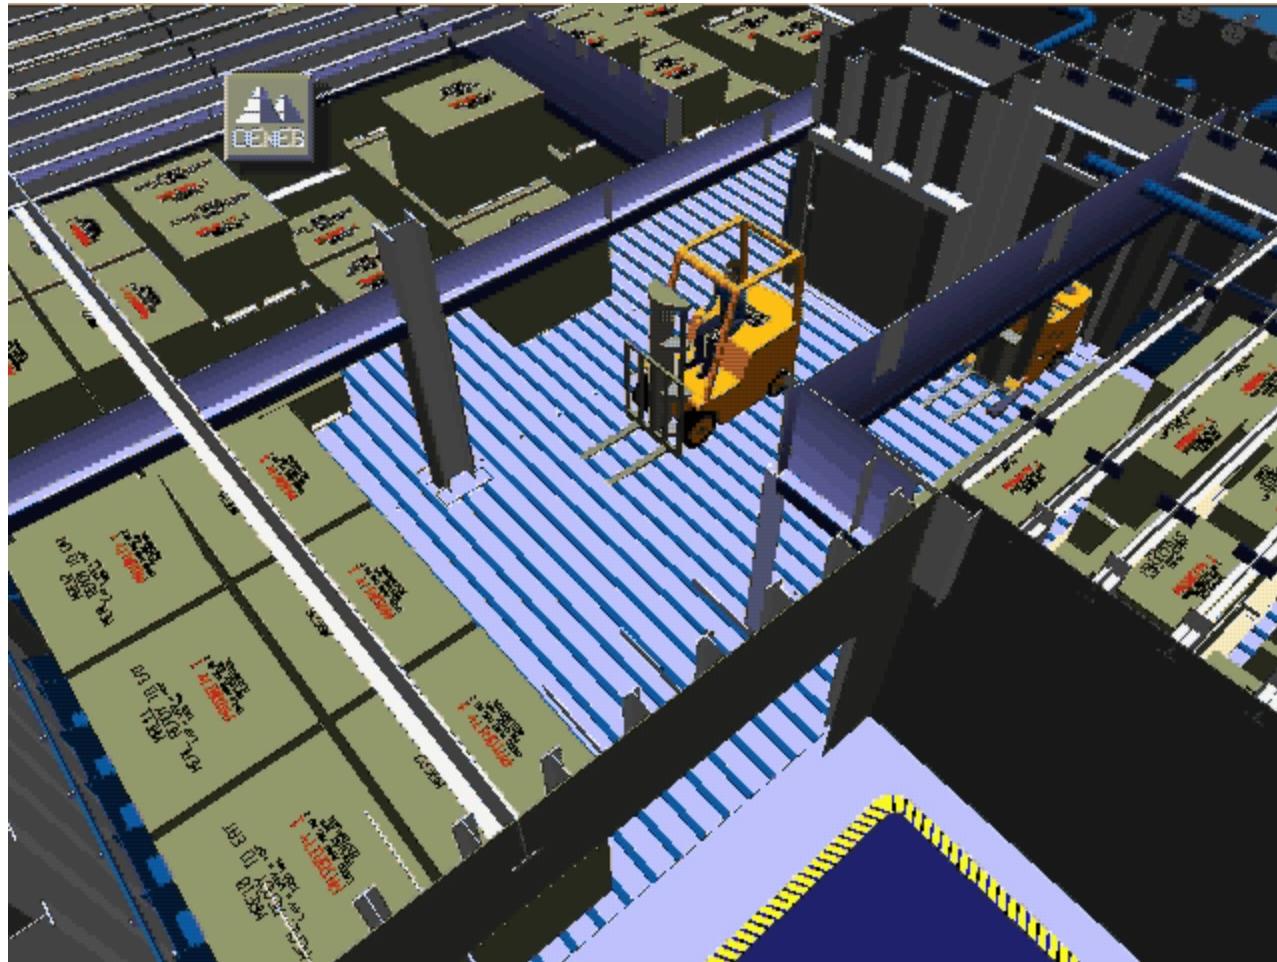

As-Built 3D Model Requirement

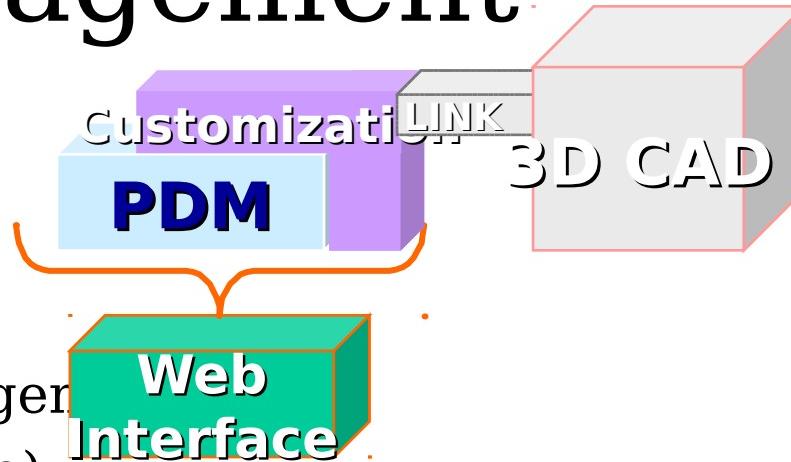

Air wake Analysis

Cargo Magazine Flow

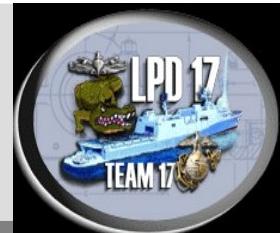

Product Data Management

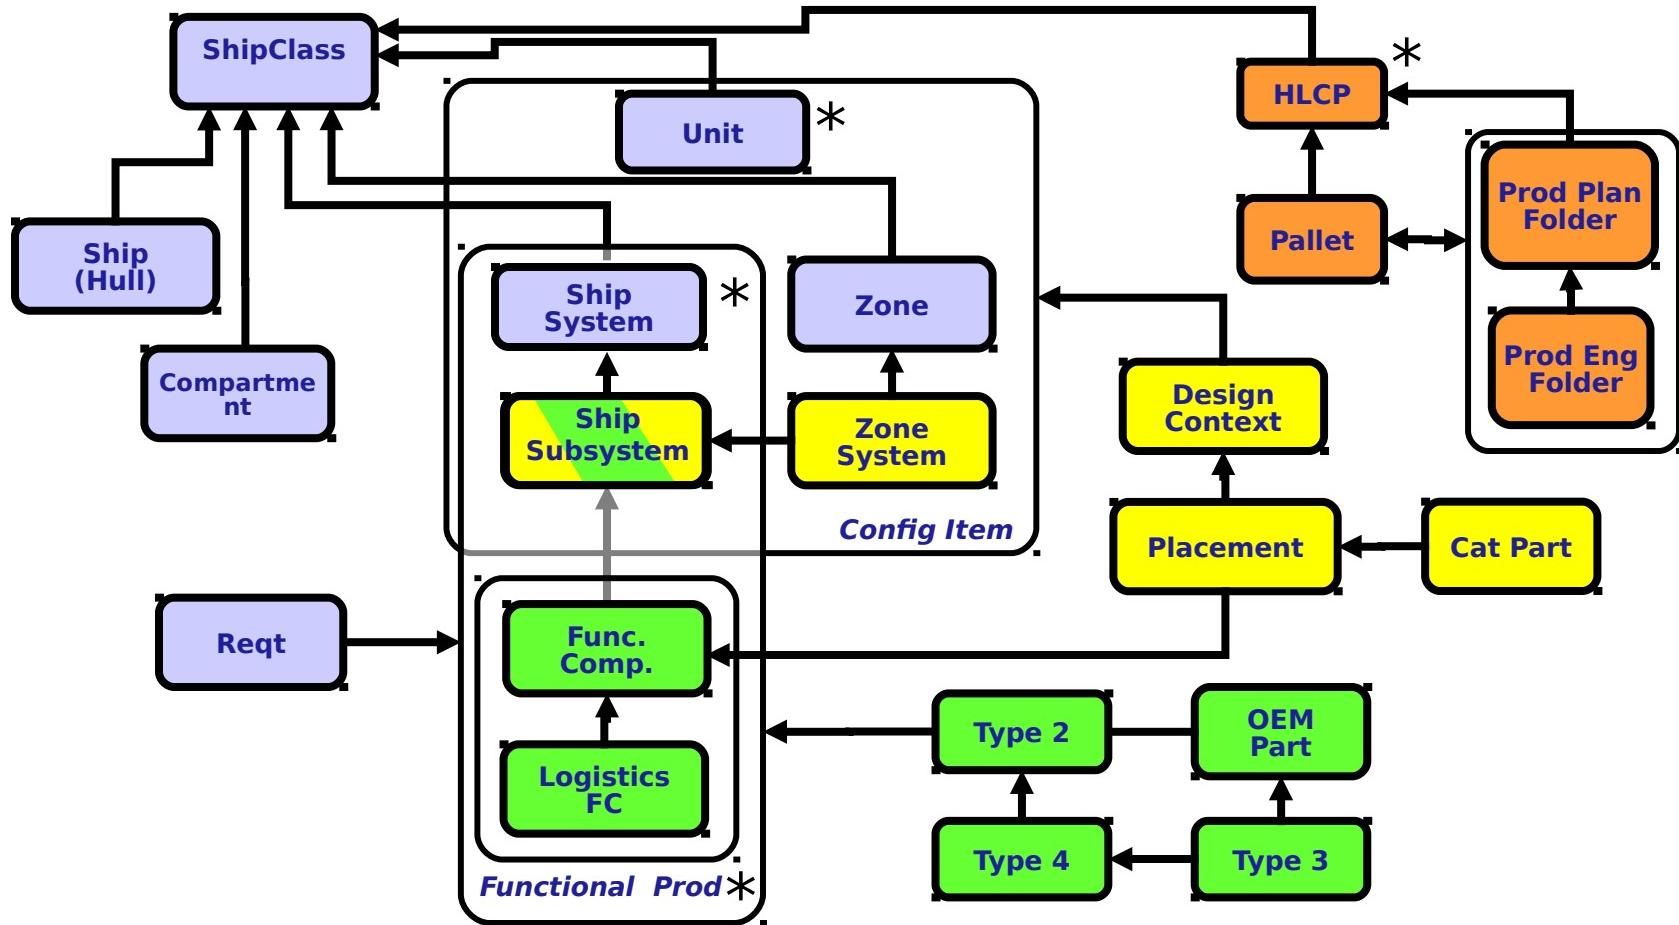

- Asset Information Manager
- COTS application (Oracle).
- Data Repository for all Ship Product Information
- Enables Configuration Management of Drawings, Technical Data, Production Data, 3D Models, etc.
- Connectivity checks complete between HQ, Field Activities and Design Site.
- Personnel able to review products and provide comments electronically. Redline Capability
- Works in conjunction with 3D Modeling Toolset

LPD 17 Product Structure (AIM)

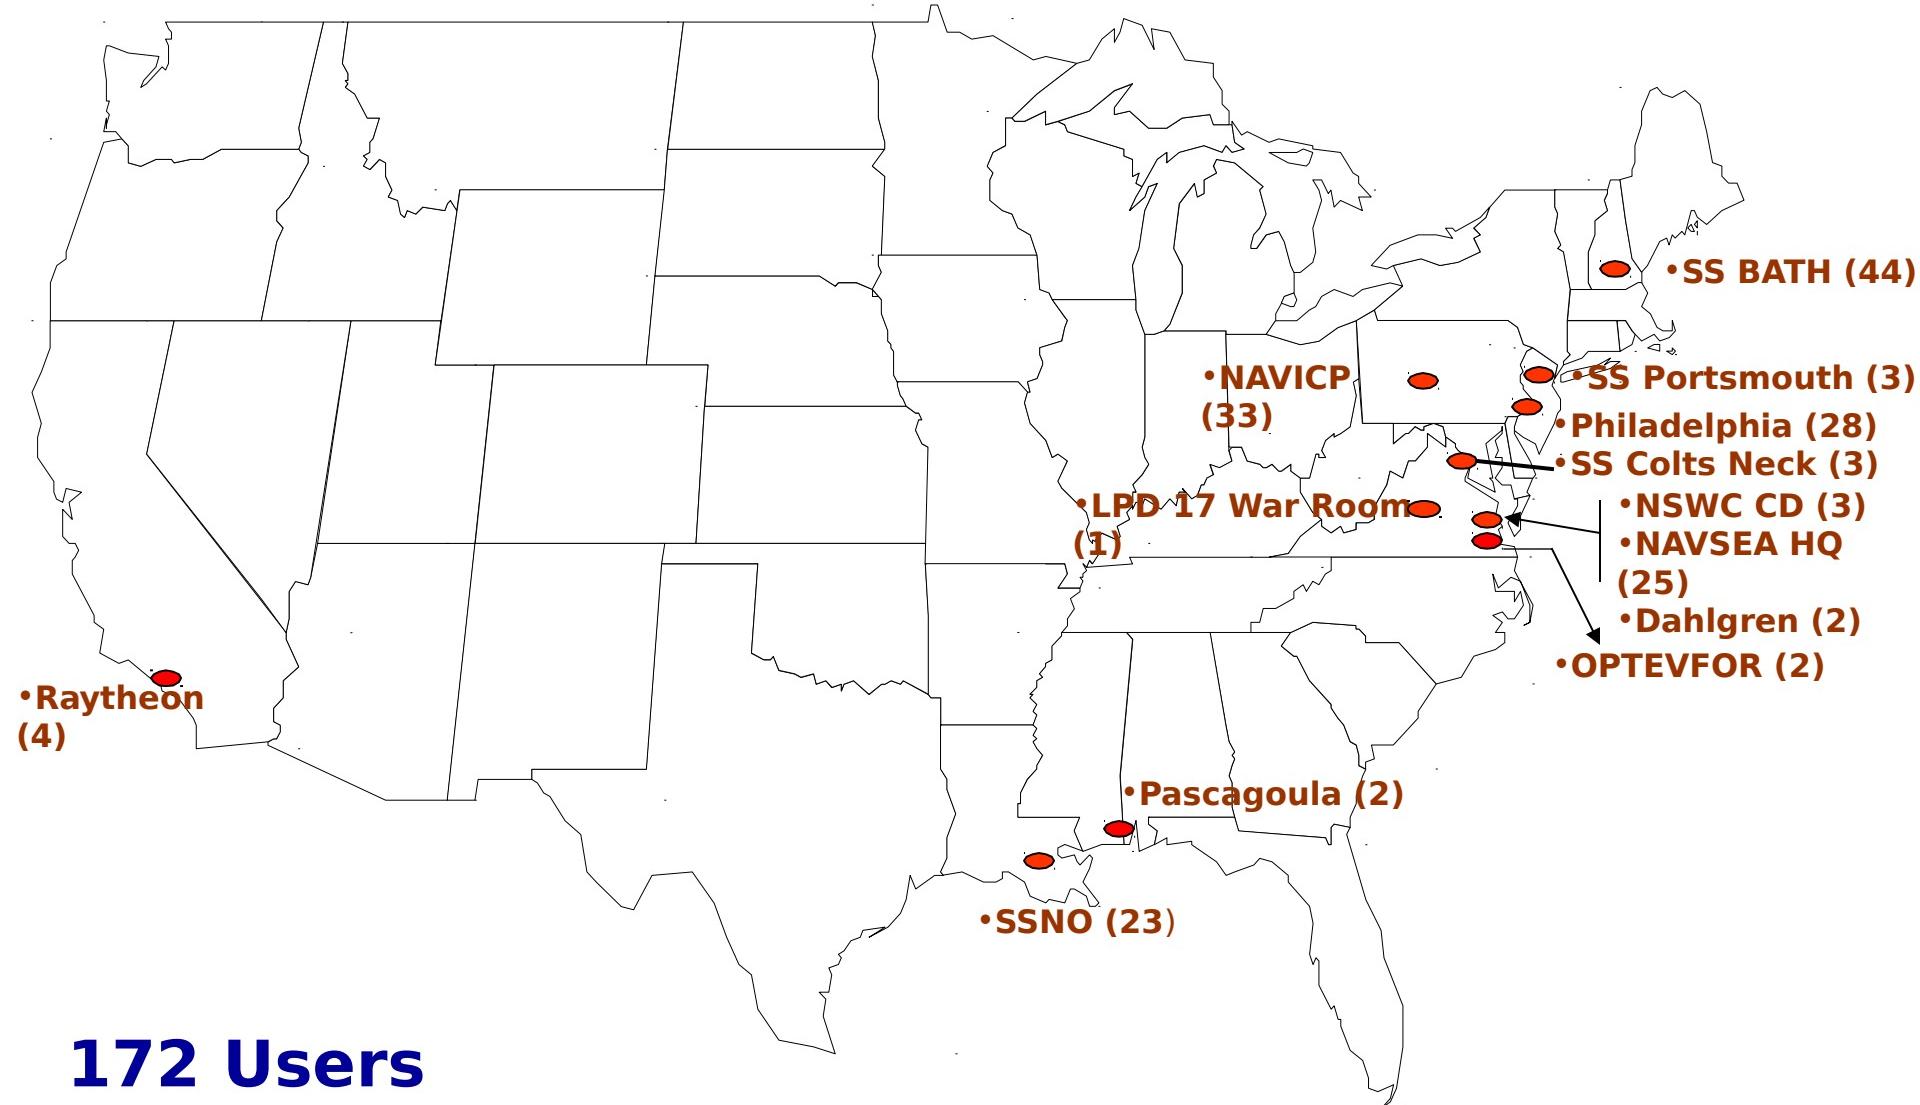

AIM Product Structure

Navy Infrastructure Access

AIM Navigator Status (Off-Sites)

Summary

- LPD 17 IPDE in Place and in Use
- Current focus
 - Life Cycle Support Role/Functions
 - Integration with N/MCI
 - Complete the Migration to a Web Based IDE
 - VRML Integration with PDM Data
 - Evolving Security Requirements
 - Firewall Policies, N/MCI, etc.
